# WHY USE WOOD?

Plaswood is manufactured by bpi.recycled products the long established market leader in the production of plastic wood. We are the largest recycler in Europe with the ability to recycle in excess of 70,000 tonnes each year across our Environment Agency Accredited Sites.

As a result of the increasing need for sustainability within our economy the environmental benefits of recycling plastic are becoming better recognised. Recycling plastic keeps reusable material in the economy, diverts waste from landfill and conserves resources. Increasing the use of recycled products has an enormous impact on the environment.

- Reduction of energy consumption by two thirds.
- Reduction of greenhouse gas Carbon Dioxide by 1.4 tonnes.

Plaswood is an award winning long life environmental alternative to traditional materials. Used widely by many organisations in both the public and private sector Plaswood versatility of design means it can be fabricated into furniture, fencing, walkways and many more products to enhance any park, garden, town centre, school, leisure or play area.

## Smoking Ban Solutions

### Cigarette Bins

Providing an attractive disposal method for cigarette ends, the bins have a stainless steel liner which is easily removed and are clad with Plaswood slats in black, grey, brown or dark green.

### Seating

Plaswood seating comes in a variety of styles and colours. The range includes a number of bench styles alongside picnic tables to complement any environment.

### Dome Top Bin

Incorporating the dome top in the bin design ensures that birds and squirrels etc cannot access it, which will ensure the waste stays in the bin. Metal liner included and a locking system gives easy disposal. Available in black, grey, brown or dark green.

### Decking

Plaswood can now be used to replace traditional wooden decking by using the moulded 32mm x 150mm planks. The connect fixing system and the technical data sheet showing a step by step guide on how to achieve this, Plaswood will give years of maintenance free decking in any outdoor environment. Available in black, grey, brown or dark green.
